

# NATURALLY BETTER!

Mills Organics is a product line for the organic cultivation of high-quality crops.  
Grown entirely without chemical substances.

## GROWTH CHART

(THIS CHART IS A DIRECTIVE)

**VALUES PER 10 LITERS OF WATER!**

### GROWTH PHASE

### BLOOM PHASE

WEEK	1	2	3	1	2	3	4	5	6	7	8
<b>GROW</b>	20ml	20ml	20ml								
<b>BASE</b>	5ml	10ml	20ml	35ml	40ml	40ml	60ml	80ml	80ml	50ml	50ml
<b>CAL</b>	5ml	5ml	10ml	13ml	15ml	15ml	15ml	15ml	15ml	15ml	15ml
<b>BLOOM</b>				20ml	20ml	20ml	20ml	20ml	20ml	20ml	20ml

*All products are developed, manufactured and bottled in Holland.*

### **GROW**

Grow is an organic, nitrogen-rich formula, developed to ensure optimal root development and accelerated plant growth. Containing plant-based amino acids, Grow provides the necessary building blocks for the production of enzymes and proteins, which are crucial for good plant health. Ensuring that young plants develop properly and have a strong and healthy root structure will give your plants the best possible start.

### **CAL**

Cal is obtained from organic material (limestone) and plays a crucial role in keeping plants healthy at the cellular level. Cal activates the enzymes needed for your plants to grow and is essential for reinforcing and maintaining the cell wall structure. The use of Cal throughout the growing cycle results in stronger plants with larger and fuller flowers. Stimulating effect on the metabolism, which makes the plant grow faster.

### **BASE**

Base is a complex blend of organic micro and macro nutrients, developed to ensure optimal plant growth throughout its life cycle. With Base, you create a foundation for healthy, strong, luscious green plants. Base allows plants to better absorb available nutrients. This product with high organic matter content is rich in fulvic and humic acids, which give the plant cells more energy through a process of chelation. Base is suitable for use in organic agriculture and horticulture and should be used in conjunction with our Bloom during the flowering phase.

### **BLOOM**

Bloom provides the perfect balance of nutrients to promote flower growth. It is an organic product that can be directly absorbed by the plant. Being a unique source of organic potassium, which is essential for flowering plants, Bloom gives larger and heavier flowers with excellent terpene and resin profiles.
